

Care for your new windows and doors

We hope you are pleased with your new Bereco timber windows and doors. Your Teknos Care Kit has been specifically designed to keep your windows and doors looking as new as when they first arrived. Regular maintenance of your home's wooden windows and doors will restore lustre to the finish and prolong the period between maintenance times.

What's in my Teknos Care Kit?

Teknos Care Kits contain:

- **TEKNOCLEAN 1956-00**
A concentrated, alkaline cleaning agent for removal of dirt and grease from painted surfaces.
- **TEKNOCARE 4250**
A water-based product to restore the sheen on lack-lustre exterior wood surfaces.

How do I use the Care Kit?

Step 1: Clean them

Clean your home's windows and doors twice a year, preferably before summer and winter. Apply TEKNOCLEAN 1951 using a brush, cloth or sponge to remove dust, grime and insects which can lead to an increase in green algae and other surface growths.

For light cleaning use 10ml per 8-10 litres of water.
For thorough cleaning use 50ml per 8-10 litres of water.

Rinse the surfaces thoroughly with clean water.

NB Most window cleaning products contain ammonia which will inhibit the effectiveness of the Care Kit. After cleaning panes in windows and doors, wash off any residue that may have splashed onto the wood and dry with a cloth.

Step 2: Care for them

After Step 1 – Cleaning; apply TEKNOCARE 4250 with a soft brush or cloth. The product is delivered ready for use, no dilution is needed. Work the product gently into the surface to restore its shine and protect it for longer.

It's a good idea to carry out Step 2 – Care; immediately after installation of your doors or windows, as well as every six months (but not during a frost).

Teknos paints

The joinery in your timber windows or doors has been painted in Teknos, a leading supplier of paints for window and door manufacturers in the UK & Ireland.

When the time comes to repaint contact Bereco on 01709 838 188. We can help you identify the correct shade.
