AMBIENT WINDOWS & DOORS

The Sound of Silence

Noise has become so common in everyday life that it is almost accepted but exposure to noise does not only have the ability to cause irritation and stress but studies have shown that this can be linked to serious health issues such as cardiovascular disorders, heart disease, stroke and dementia. A study undertaken by the World Health Organisation showed that three in one hundred deaths in the UK are caused by exposure to noise. It is essential that we take measures to protect ourselves from this noise and in order to do so we must look to our homes.

Bereco Ambient Timber Windows and Doors have been designed to provide a home soundproof solution that you can rely on and one which will turn your home into a haven of calm. The range of noise reducing timber windows and doors includes sliding sash windows, casements, entrance doors, french doors and folding doors and with a range of noise reducing levels from 38dB right up to 42dB we can help you find a solution which will restore the sound of silence.

As each level within the range has been awarded Bluesky Noise Reducing Windows certification with the 42dB window has achieving a Bluesky A-rated noise reduction level, you have complete peace of mind of the noise reduction level you will experience. The majority of windows and doors on the market would achieve a C, D or E rating. Fitting an A-rated product will greatly reduce noise levels in the building compared to a standard window and will be sufficient for almost all cases. Installing a certified noise reducing window ensures a proven level which gives you complete assurance.

Whatever your noise exposure, the Ambient Range will help you create a home of calm and tranquillity in which you can be truly safe and sound. Whether positioned on a busy high street or an airport, with an overall window dB rating of up to 42dB you will find a solution to restore your very own sound of silence.

WHY CHOOSE AMBIENT WINDOWS?

42dB Noise Reduction

Whether positioned on a busy high street or an airport, with an overall window dB rating of up to 42dB you will find a solution to restore your very own sound of silence.

Bluesky Certified

Unique in that we have certified the window as a whole you have complete assurance that the dB rating we are stating is the sound reduction you will experience.

A-Rated Noise Reduction

We have achieved a Bluesky certified A-rated noise reduction level which will help you create a home of calm and tranquility in which you can be truly safe and sound.

Safe and Sound

Acoustic glass security ratings of P2 and P4 as standard surpasses the P1A required for Secured by Design and Part Q of the Building Regulations, keeping your home both soundproof and secure.

Thermally Efficient

With whole window u values as low as 1.3 W/m^2K, 7% better than current LB1 Building Regulations, you can rest assured that your home is not only safe and sound but warm and cosy.

Weatherproof

Weatherproofing and soundproofing go hand in hand and as such all products are tested to perform against all weather conditions with sliding sash windows tested to perform against winds of 136mph.
